Drug Class Review on Pharmacologic Treatments in ADHD

Marian McDonagh, Pharm D
Oregon Evidence-based Practice Center

Following discussions about the ADHD report, the workgroup talked with Dr. Childs about the following data reports. Dr. Childs offered to provide the following information:

- Data on each drug in the ADHD report and show the number of kids, their gender, and age
 - Getting more than 100mg. per day and 140 mg. per day, of methphenidate immediate release and extended release.
 - Getting more than 140 mg. per day of amphetamine salt mixture immediate and extended release.
- The number of clients, Rx's, and drug dollars for ADHD drugs and one of the new sedative/hypnotics.

The meeting was adjourned at 4:00
